## MIRROR KITS

### GENERAL

#### Kit Numbers

91657-02, 92096-05, 91315-04, 91697-06A, 91696-05A, 92416-08, 92398-09, 92410-09, 92441-10

#### Models

For model fitment information, see the P&A Retail Catalog or the Parts and Accessories section of [www.harley-davidson.com](http://www.harley-davidson.com) (English only).

#### Kit Contents

See Figure 1 and Table 1.

### INSTALLATION

#### NOTE

Proper installation of some mirror kits on certain models with turn signals mounted on the underside of the hand lever housings requires installation of the original equipment (OE) lockwasher instead of the spring lockwasher (item 5) included in the kit.

1. Remove and discard the existing mirror and acorn nut used to mount the existing mirror. Retain the original internal tooth lock-washer.

#### NOTE

For step 2, for all kits except 91696-05A, 92398-09 and 92410-09, install small washer (3) to mirror stem before inserting into hand lever housing. For Kit 91696-05A, the stem does not require washer.

2. For motorcycles with turn signals mounted to the underside of the hand lever housings: See Figure 1. Secure the mirror using flat-washer (3) in the top position as noted above, and the stock internal tooth lock-washer (from step 1) and acorn nut on the bottom side of the turn signal mount. Discard item 4 and 5. For motorcycles with turn signals mounted away from the hand lever housings: See Figure 1. Install the small washers (3) onto the mirror studs. Insert the mirror studs into the holes in the hand lever housings, and secure the mirrors with the washers (4), lockwashers (5) and acorn nuts (6) from the kit.
3. Adjust the mirrors for proper field of vision and tighten the acorn nut to 16 N·m (12 ft·lbs). Check mirror adjustment and reposition if necessary.
