J04782

REAR BLACK 5-SPOKE CAST ALUMINUM WHEELS

GENERAL

▲ WARNING

Install only wheels and installation kits approved for your model motorcycle. Contact a Harley-Davidson dealer to verify fitment. Mismatching wheels and installation kits or installing wheels not approved for your model can cause loss of control, which could result in death or serious injury. (00610c)

Kit Number

43635-08, 55082-11

Models

For model fitment information, see the P&A Retail Catalog or the Parts and Accessories section of www.harley-davidson.com (English only).

Kit Contents

See Figure 1 and Service Parts Tables.

Additional Parts Required

These kits include the custom wheel only.

Proper installation of these kits require the separate purchase of the following parts which are available at a Harley-Davidson dealer:

- Wheel Installation Kit (See Table 3 through Table 5 to determine required installation kit.)
- Brake disc and sprocket screws (See Table 1 to determine proper hardware.)
- Wheel Bearing Remover and Installer (94134-09)

Recommended Parts

The following Harley-Davidson Genuine Motor Accessories are recommended for proper maintenance and cleaning:

- Harley[®] Glaze[™] Polish and Sealant (99701-84)
- Harley[®] Wheel and Spoke Brush (43078-99)
- Harley-Davidson[®] Wheel and Tire Cleaner (94658-98)
- Harley[®] Preserve Bare Aluminum Protectant (99845-07)

A WARNING

Rider and passenger safety depend upon the correct installation of this kit. Use the appropriate service manual procedures. If the procedure is not within your capabilities or you do not have the correct tools, have a Harley-Davidson dealer perform the installation. Improper installation of this kit could result in death or serious injury. (00333b)

NOTE

This instruction sheet references service manual information. A service manual for your model motorcycle is required for this installation and is available from a Harley-Davidson dealer.

Touch-Up Paint

Touch-up paint (98601DH) for Kit 43635-08 is available from a Harley-Davidson dealer.

INSTALLATION

NOTE

Use plastic protectors on tire mounting tools and rim clamps when mounting a tire to a painted wheel.

For wide low profile tires a tire mounting machine with a second arm to press down on the sidewall while the wheel is rotating is recommended.

When mounting tires, liberally use tire lube on the wheel and

For tire removal, use plastic inserts between the rim and tire after breaking the bead to create a large enough gap for the rim clamps to get into.

 Remove existing rear wheel assembly. Save axle, axle nut, brake disc, and wheel spacers for kit installation. Refer to REAR WHEEL in Service Manual.

NOTE

Prior to removing or installing the wheel, the rear brake caliper must be removed.

The cotter pin or spring clip for the axle nut must be replaced. They are available for purchase from your dealer. See your dealer for the correct part number for your model motorcycle.

NOTE

Install short valve stem (43157-83A) included in the installation kit. Discard all other valve stems.

See Figure 1. Install valve stem assembly (H) on wheel. Refer to TIRES in service manual.

NOTICE

Do not re-use brake disc/rotor screws. Re-using these screws can result in torque loss and damage to brake components. (00319c)

NOTICE

Do not re-use sprocket mounting screws. Re-using sprocket mounting screws can result in torque loss and damage to the sprocket and/or belt assembly. (00480b)

 Assemble wheel installation kit components, stock brake disc, and sprocket compensator bowl to wheel using the appropriate service parts table. Refer to REAR WHEEL in service manual.

NOTE

The primary bearing is installed on the brake disc side of the wheel. Install the primary bearing first using appropriate service manual and WHEEL BEARING REMOVER/INSTALLER.

The shims provided in the installation kits are not required for these wheels and can be discarded.

 Install rear wheel (1), stock axle, and stock spacers to motorcycle. Refer to REAR WHEEL in service manual.

MAINTENANCE AND CLEANING

Parts must be maintained regularly to keep their original shine and luster.

- Clean heavily-soiled wheel surfaces using Harley-Davidson Wheel and Tire Cleaner, applied with Harley Wheel and Spoke Brush.
- After cleaning and polishing, seal the finish with a good quality sealer, such as Harley Glaze Polish and Sealant.
