LEFT TANK CAP

GENERAL

Kit Numbers

57300149, 57300150, 57300151, 57300165, 57300185, 57300186, 57300216, 57300236

Models

For model fitment information, see the P&A retail catalog or the Parts and Accessories section of www.harley-davidson.com (English only).

INSTALLATION

NOTE

DO NOT pry the existing left tank cap off the tank. The adhesive is part of the base and not sold separately.

1. To remove original left tank cap, press down and turn the existing left tank cap counterclockwise to remove.
2. When installing, position cap so that the tabs align, press down and turn the cap clockwise to lock. There is a 20° variance on the cap to allow for proper alignment on the tank.

CARE AND CLEANING GUIDELINES FOR BRASS PARTS

Cleaning Instructions

1. Verify part is dry and free of dirt or debris.
2. Place a small amount of Harley-Davidson® Chrome Clean & Shine on a microfiber cloth or detailing swab.
3. Using light pressure, rub the brass parts with the microfiber cloth. For hard to reach places or grooves, use the detailing swab.

Obtaining a Bright Finish

Brass parts will naturally age and darken with time. If a bright brass finish is preferred, place some Harley-Davidson Bare Metal Polish on a microfiber cloth and lightly rub on the brass parts until they reach the desired brightness.

Slowing the Natural Aging Process

To slow the aging process of the brass parts, place a small amount of Harley-Davidson Glaze Poly Sealant on a microfiber cloth or detailing swab, and lightly rub on the parts until the sealant has soaked in.

Precautions

- Use of non-recommended cleaning, polishing and protective products will result in the removal of the aged finish from the brass parts.

- Prolonged contact with certain items (hands, gloves, boots, dust, etc.) and exposure to the elements will also alter all surface finishes and is NOT considered a defect.
- Avoid cleaning parts with abrasive and aggressive chemicals and abrasive cleaning pads.
- Avoid ammoniated products and bleach.
- Prolonged exposure to water will alter the brass finish. Wipe down parts after contact with water.
- Excess rubbing may lighten the surface appearance of the part.
