INSTRUCTIONS

-J01569 REV. 10-02-2002

Kit Number 29131-00

"ALUMINATOR" AIR CLEANER TRIM INSERT

General

This kit fits 1999 and later Twin Cam 88 model motorcycles equipped with a stock air cleaner cover.

See the Service Parts list for kit contents.

NOTE

If the screw provided in this kit is not long enough to engage the threaded mounting hole on the air cleaner (as is the case with some Screamin' Eagle air cleaners), a longer screw, Part Number 29703-00, is available from your Harley-Davidson Dealer.

Installation

1. Remove and discard the original air cleaner cover screw.
2. Carefully remove and discard the stock air cleaner trim ring from the front of the air cleaner cover. Adhesive left on the air cleaner cover can be removed with mineral spirits.
3. See the Service Parts illustration. Install the new air cleaner trim insert (1) using the new screw (2) from the kit, and tighten to 36-60 **in-lbs** (4-7 Nm).

Cleaning and Polishing

CAUTION

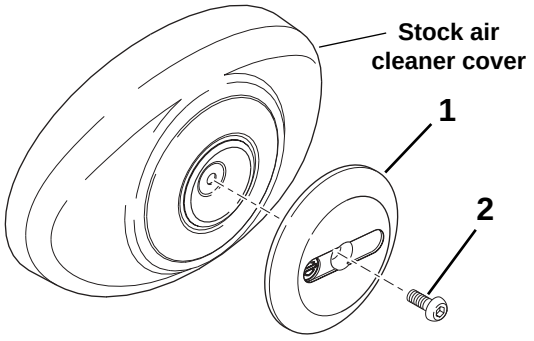

Use only a clean, soft, non-abrasive cloth to clean and polish this accessory. When polishing, use only a non-abrasive polish and only a non-abrasive wax. Harley-Davidson recommends using Harley Glaze® Polish and Sealant. Keep polish out of the logo recesses. Abrasive polish or wax may dull or scratch the finish.
