VOICE RECOGNITION

1. **Select:** Voice recognition (6).
2. When the system beeps, speak a voice command into headset microphone.

ITEM	ICON	FUNCTION
30		Search: Opens up search bar.
31		Menu: Opens a menu of additional options. Select the icon again to return to the original screen.
32		Pause or stop route.
33		Repeat: Repeat navigation route instruction.
34		Apple CarPlay: Takes the things you want to do with your iPhone while riding and puts them right on your radio's display.
35		Android Auto: Takes the things you want to do with your Android phone while riding and puts them right on your radio's display.

ACTIVATION REQUIREMENTS

Apple CarPlay®/Android™ Auto

- Rider headset with microphone connected to radio through a wired or wireless connection.¹
- An iPhone 5 or newer/An Android phone running Android 5.0 and up with a data plan.²
- iPhone or Android phone connected via the USB port.

¹ The vehicle may require the purchase and installation of additional parts or accessories to enable wired/wireless headset connections. Consult your Harley-Davidson® dealer.

² An Android 6.0 phone and up is recommended for best performance.

Setup

NOTE

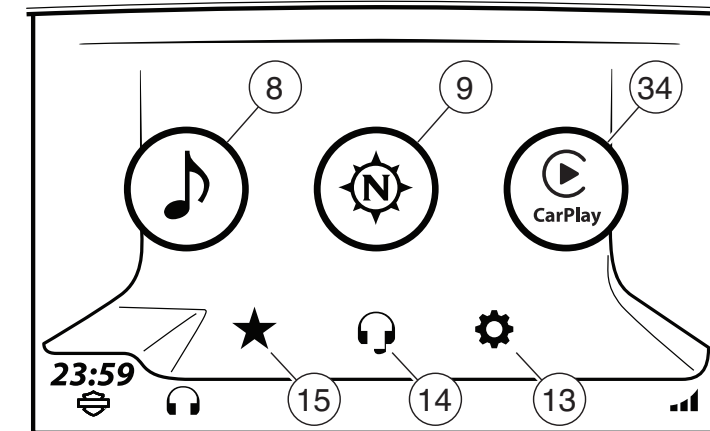

No app is required for Apple CarPlay operation.

1. Switch power to Accessory, Ignition or Run (CVO™ models).
2. **Connect:** Wired or wireless headset to vehicle.
3. **Connect:** iPhone to USB port on vehicle.
 - a. CarPlay icon (34) or Android Auto icon (35) replaces phone icon (10) on Home page.
4. **Select:** CarPlay (34) or Android Auto (35).
5. Apple CarPlay is visible on radio screen.

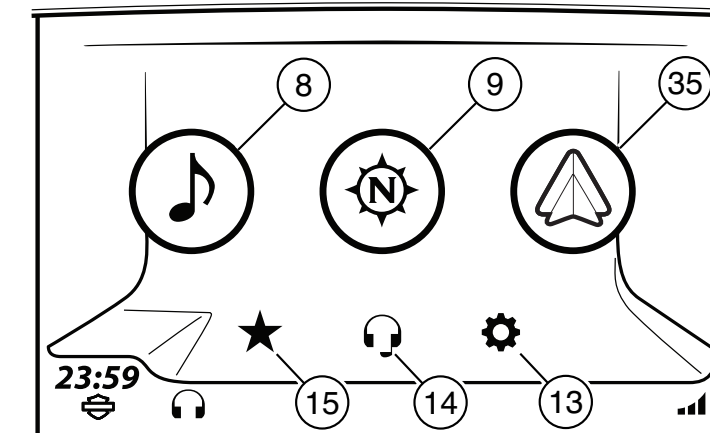

Troubleshoot

If Apple CarPlay/Android Auto does not activate, in no specific order please verify:

1. Headset is connected to vehicle.
2. iPhone/Android phone is connected via USB port.
3. Projection Mode is turned on in radio settings.
 - a. **Navigate:** Home (7) > Setup (13).
 - b. **Select:** Projection Mode ON.
4. Verify Apple CarPlay is enabled in iPhone settings/Android Auto app is installed and up to date (from Google Play Store).
5. Verify Siri is enabled in iPhone settings/GTS Radio software is M21.20.17.00 for Android Auto operation.
6. Verify Apple CarPlay can be accessed while iPhone is locked in iPhone settings/ALL notifications for Android Auto are turned off.
7. Verify factory phone USB cable is used. This ensures proper performance for data change.
